Firebase

jQuery

WORK EXPERIENCE

Front End Web Developer Q Link Wireless

02/2021 - Present

Dania FL

Achievements/Tasks

- Implemented new user checkout process by rearchitecting existing React Component to integrate directly with Google Pay and Affirm.
- Worked with T-Mobile and their developers to implement E911 api's. Allowing all qlink customers to use emergency calling on their mobile devices. This provides emergency services with accurate location information.
- Used Adobe XD and Photoshop to collaborate with designers to ensure that designs were efficient, technically sound and could be delivered promptly.
- Responsible for software maintenance across the codebase. Required wide understanding of the internals of the software and systems.
- Updated ASP.NET legacy codebase to React and Redux. Optimizing overall performance of the site by reducing the amount of network requests by caching server data in redux store. As well as transitioning to a single page application for quicker load times.
- Experience with multiple project management tools such as Jira, Asana, TFS.

EDUCATION

Web Development Ironhack

03/2020 - 12/2020

Miami, FL

Courses

- Created a full stack web study app that let users create notes, take tests, complete with authentication. React was the framework used on the front end, Express Mongoose and MongoDB for backend and database.
- Utilized Github to collaborate with a team developers on the same project.
- Implemented third-party api's to build desktop and mobile friendly React apps that allowed users to look up various recipes by ingredients and workouts via muscle groups.
